

Good Mobile Messaging™ S/MIME

Military-grade encryption for mobile device security and management

Good Mobile Messaging S/MIME provides the highest standard of data encryption for the secure delivery of email, calendar, and contacts —in real time—to handheld devices.

For mobile government personnel, staying productive means staying connected to colleagues and constituents. Good Mobile Messaging S/MIME is a wireless email solution that extends S/MIME security benefits, such as authentication, privacy, and integrity of email to Windows Mobile® smartphones. In addition, Good Mobile Messaging S/MIME is designed to work with Department of Defense (DoD) Public Key Infrastructure (PKI) and Common Access Cards (CACs).

END-TO-END SECURITY

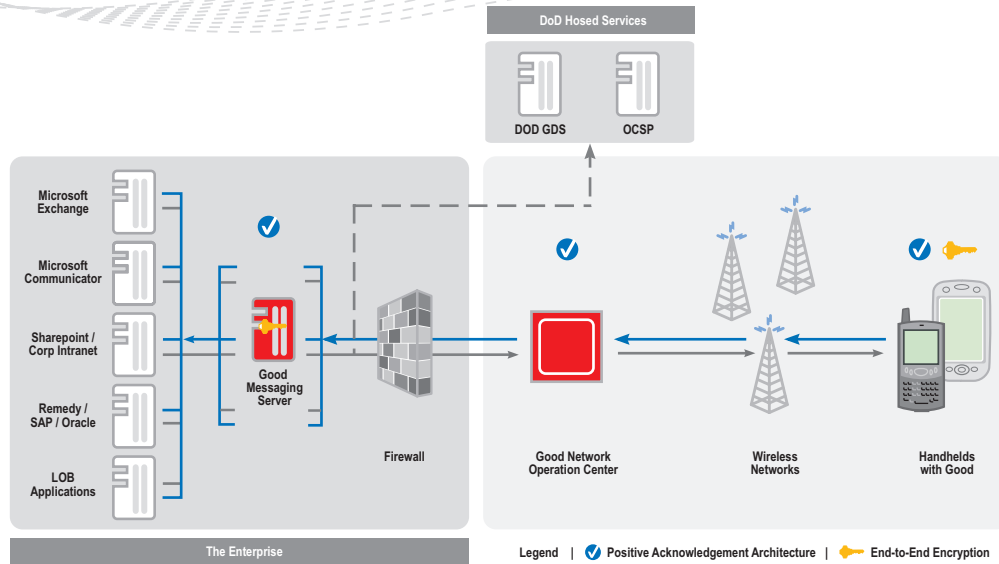

Good Mobile Messaging S/MIME provides enterprise-class, end-to-end security that protects the enterprise firewall, over-the-air (OTA), transmissions, and the device itself. Data transmissions and sensitive information on the mobile device are secured with industry standard AES encryption. All Good servers are deployed behind the firewall with a secure outbound connection using standard port 443.

VISIBILITY AND CONTROL OF YOUR ENTIRE FLEET

As part of the Good for Government platform, Good Mobile Messaging S/MIME is fully integrated with the web-based Good Mobile Control portal, making it simple for IT managers to manage policies, settings, installations, and upgrades with robust wireless OTA capabilities. You can minimize troubleshooting and support costs with complete, real-time visibility of the entire mobile deployment, including hardware type, ROM version, software versions, and even handheld radio status. You'll spend less time managing desktop software and manually tracking mobile devices and more time enabling connectivity and access.

“ Good had the right features, benefits, and services we were looking for to meet our overall security, reliability, and functionality objectives. ”

LTJG Ronald Wright
United States Coast Guard

MOBILE END-USER BENEFITS

FEATURES	BENEFITS
Email support	Create, send, receive, delete, file, search, and sort email; synchronize email sub-folders, and filter email by unread, flag, or more
View preferences	View email via preview pane or single- or double-line display, as well as by email "conversation"
RSS news feeds	Stay up-to-date on news and information; integration with email and PIM makes it easy to read the latest news and share RSS news feeds
Full calendar support	Respond to meeting requests, check free/busy status of attendees, and view by day or by month.
Contact management	Add, delete, edit, and search contacts; access your corporate directory

IT BENEFITS

FEATURES	BENEFITS
Security	Designed for HSPD 12 and DoD 8100.2 compliance; FIPS 140-2 certified. No inbound firewall holes, remote control of password policies and handheld components such as cameras and Bluetooth; ability to enforce IT policy compliance and to prohibit use of certain handheld applications
OTA Management and Administration	OTA deployment, upgrade, and management of Good and third-party apps (like virus protection) eases burden on IT; management dashboard provides a complete view of your mobile deployment, including users, by device type and OS version; customizable policy management; option for SD card install.
